

Table S1: Outcome data by SWAT group allocation, by chosen mode of delivery

	Intervention	Control	Interaction (subgroup comparison)
<b>PRIMARY</b>			Odds ratio*
<b>Valid response for WORKWELL trial primary outcome n(%)</b>			
Postal	53(80)	57(85)	0.30 (0.08 to 1.13) (P = 0.075)
Electronic	47(85)	40(71)	
<b>Valid total 6 month WLQ score n(%)</b>			Odds ratio*
Postal	48(74)	51(76)	0.39(0.12 20 1.27) (P=0.118)
Electronic	45(81)	37(66)	
<b>Valid response for WORKWELL trial primary outcome without reminder n(%)</b>			Odds ratio*
Postal	20(30)	23(34)	0.74(0.25 to 2.22) (P=0.591)
Electronic	17(31)	16(29)	
<b>Number of reminders Median(IQR)</b>			
Postal	1(0 to 2)	1(0 to 2)	N/A
Electronic	1(0 to 3)	1(0 to 3)	
<b>Time to valid response for WORKWELL trial (days) Median</b>			Hazard ratio*
Postal	22	22	0.70(0.39 to 1.87) (P=0.211)
Electronic	23	24	
<b>Total Cost (£) Mean (SD)</b>			
Postal	8.22(6.32)	5.78(5.16)	N/A
Electronic	9.24(8.13)	8.32(7.77)	

\*Adjusted for WORKWELL arm. Odds ratios/hazard ratios represent the ratio of the effect for those who opted for postal questionnaire delivery compared to that for those who opted for electronic delivery.
