

A *T. brucei* GC Content (%)

B *T. lewisi* GC Content (%)

Additional file 5: Figure S5.

Graphs show the GC percentage of *T. brucei* (A) and *T. lewisi* (B) maxicircle coding regions. The regions where the percentage GC content value lies above the dashed lines are likely undergo RNA editing. The window size used for this analysis was 100 nt.
