

## Introduction

The fee you have paid for this resource allows you to photocopy the pages inside as often as you wish for use within your own institution, or if you are a visiting writer, for use within all the schools where you offer a *Build a Book Workshop*.

This photocopiable resource contains two sections. The first includes planning sheets for teachers. The second section is made up of sheets that may be used with students.

The students' sheets are particularly aimed at allowing students to work on their own without teacher input. This may allow you a more flexible way of working.

### **Blurb**

The Build a Book Workshop is a step-by step guide for teachers and writers, that shows you how to organise creative writing workshops with a difference and with a very tangible end product. Your students can see their work turned into a book that has a spine and can sit on a shelf, raising money for charity at the same time.

This photocopiable resource makes conducting the Build a Book Workshop even easier. It contains:

- Checklists for the organisers
- Planning sheets
- Prompt sheets for students
- Templates for marketing materials
- Templates for permission slips
- Templates for letters
